CDF BLUE 30

BLUE TRANSPARENT | INSIDE INSTALLATION

DECORATIVE FILM

Self adhesive polyester film for diverse retrofit privacy applications. With a multitude of patterns the CDF films can also be used as excellent decorative means of design (glass partitions etc.).
Decorative films are perfect for optically breaking up large and monotonous glass areas. They split up the space and create shielding effects. The glazing mainly remains see-through. The decorative patters however convey a partial private atmosphere, since the view is not totally free. Decorative films also serve as accident prevention.
They can make invisible glass areas visible through optical warning marks, without obstructing the view seriously. In comparison to printed or sandblasted glass, the decorative films can be installed retrofit with little effort on site and also be removed residue-free.

Material Construction Self Adhesive Film

- Transparent polyester base film.
- Partially printed surface.
- Siliconised liner on the adhesive.
- Acrylate adhesive system.

BRUXSAFOL Warranty	2 years inside installation
Storage	Recommended at +15° C up to +25° C and rel. humidity 50%: approx. 2 years
Possible Widths	☐ 183 cm ☑ 152 cm ☐ 122 cm ☐ 91 cm

Film-to-Glass Guide

When outside glazing is partially or completely filmed, thermal stress can cause glass damage. This does not affect glazing inside the building without direct sunlight or notable temperature fluctuations.
