

STATIC CLING

DECORATIVE FILM

CDFS 6001 is the ideal solution for quick privacy protection, for example during renovation work. It diffuses the light, preventing direct view, but hardly affecting the brightness of the glass surfaces.

The CDFS films are for simple and quick decorative designs or privacy applications. Compared to self-adhesive films, the static cling films save a considerable amount of time during installation and also during future reinstallation.

Therefore CDFS films offer the most cost-effective solution for short and medium-term applications.

Material Construction

- PVC base film.
- Printed and/or textured surface.
- Transparent liner on the back.
- Static Cling Design.

BRUXSAFOL Warranty 2 years inside installation (without extreme sun exposure)

Storage Recommended at +15° C up to +25° C and rel. humidity 50%: approx. 2 years

Possible Widths ☒ 120 cm

Film-to-Glass Guide

When outside glazing is partially or completely filmed, thermal stress can cause glass damage. This does not affect glazing inside the building without direct sunlight or notable temperature fluctuations.
