

STATIC CLING

DECORATIVE FILM

CDfs 6031 is an extremely decorative film and combines the look of colored stained glass with a prism effect when it is illuminated. It combines an unusual structure with a varied choice of colors. This film is ideal if you want to create a real eye-catcher. ATTENTION – Not for the faint-hearted.

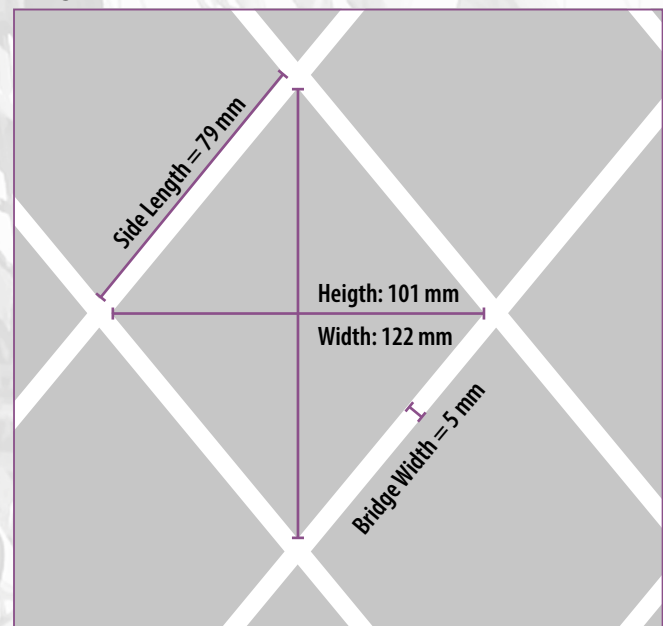

The CDfs films are for simple and quick decorative designs or privacy applications. Compared to self-adhesive films, the static cling films save a considerable amount of time during installation and also during future reinstallation.

Therefore CDfs films offer the most cost-effective solution for short and medium-term applications.

Material Construction

- PVC base film.
- Printed and/or textured surface.
- Transparent liner on the back.
- Static Cling Design.

Design:

BRUXSAFOL Warranty 2 years inside installation (without extreme sun exposure)

Storage Recommended at +15° C up to +25° C and rel. humidity 50%: approx. 2 years

Possible Widths ☒ 120 cm

Film-to-Glass Guide

When outside glazing is partially or completely filmed, thermal stress can cause glass damage. This does not affect glazing inside the building without direct sunlight or notable temperature fluctuations.
